

# 1.2 Who is Spectre Stats for?

## Who is Spectre Stats for?

Spectre Stats is built for bowlers who want to understand their game — not just track their scores. If you've ever wondered why you bowled well on one pair of lanes but struggled on another, or which ball performs best on a particular oil pattern, Spectre Stats is the tool designed to help you find those answers.

### ☐ League Bowlers

If you compete in a weekly or seasonal league, Spectre Stats helps you build a detailed picture of your performance over an entire season — not just game by game, but across different houses, conditions, and nights.

- ☐ Log every league session and track your running average over the season
- ☐ See which balls and surfaces are working best at your home house
- ☐ Review past sessions before returning to a venue so you arrive prepared
- ☐ Keep maintenance records so you always know the current surface of every ball

### ☐ Tournament Competitors

Tournament bowling introduces variables that league play doesn't — unfamiliar houses, challenging oil patterns, and the pressure of single-game elimination formats. Spectre Stats gives you a competition record you can study and learn from between events.

- ☐ Log tournaments separately from league play and track results over time
- ☐ Record which balls you used on each pattern and how they performed
- ☐ Build a history of results across different venues and formats
- ☐ Identify trends in your tournament performance — where you're improving and where you're not

# Performance-Focused Recreational Bowlers

You don't have to bowl professionally to benefit from better data. If you're a serious recreational bowler who wants to improve — whether that means raising your average, learning to read oil patterns, or simply being more deliberate about your equipment choices — Spectre Stats gives you the same tools the competitive bowlers use.

- Track practice sessions alongside competition results
- Set a baseline and measure your improvement over weeks and months
- Get more intentional about which ball you throw and why

# Bowlers With a Serious Arsenal

If you own multiple balls and actively manage their surfaces, Spectre Stats functions as a complete arsenal management system. Keeping track of coverstock adjustments, cleaning schedules, and which ball works best in which conditions becomes much easier when it's all in one place.

- Store detailed notes on every ball in your bag
- Log surface changes, resurfacing, and maintenance history
- Record oil pattern performance so you can make smarter equipment choices at the lanes
- Connect with Spectre Cloud if your pro shop uses it — pull in drilling specs automatically

# Is Spectre Stats Right for You?

| If you...                    | Spectre Stats can help you...   |
|------------------------------|---|
| Bowl in a weekly league      | Track your season average and spot patterns in your performance         |
| Compete in tournaments       | Build a competition record and review it between events                 |
| Own multiple bowling balls   | Manage your arsenal with notes, maintenance logs, and pattern matching  |
| Want to improve your game    | See your trends over time and make more informed decisions at the lanes |
| Use a Spectre Cloud pro shop | Pull in your drilling specs and ball data automatically                 |

**Note:** Spectre Stats is focused on **competition and performance tracking** — it is not a basic scorekeeper or a general-purpose bowling game app. It's designed for bowlers who want to take a more analytical approach to their game.

**Tip:** Not sure where to start? Create your account, add your balls to your arsenal, and log your next league session — even a few weeks of data will start showing you patterns you'd never spot on your own.
