

Vise

Vise Powerlift/Semi

Powerlift:

- 1/4" FORWARD pitch in the grip
- Compensate 1/4" REVERSE when drilling the hole in the ball to arrive at the ending desired pitch
- Example: Normal Flex (1/4" REVERSE) = Drill the hole 1/2" REVERSE because $1/2" - 1/4" = 1/4"$

Semi:

- 3/16" FORWARD pitch in the grip
- Compensate 3/16" REVERSE when drilling the hole in the ball to arrive at the ending desired pitch
- Example: Normal Flex (1/4" REVERSE) = Drill the hole 7/16" REVERSE because $7/16" - 3/16" = 1/4"$

Vise Powerlift/Oval

Powerlift:

- 1/4" FORWARD pitch in the grip
- Compensate 1/4" REVERSE when drilling the hole in the ball to arrive at the ending desired pitch
- Example: Normal Flex (1/4" REVERSE) = Drill the hole 1/2" REVERSE because $1/2" - 1/4" = 1/4"$

Oval:

- 0 pitch in the grip
- No compensation needed

Vise Oval/Powerlift Oval

Oval:

- 0 pitch in the grip
- No compensation needed

Powerlift Oval:

- 1/4" FORWARD pitch in the grip
- Compensate 1/4" REVERSE when drilling the hole in the ball to arrive at the ending desired pitch
- Example: Normal Flex (1/4" REVERSE) = Drill the hole 1/2" REVERSE because $1/2" - 1/4" = 1/4"$

Vise Oval Nubs

Oval Nubs:

- 0 pitch in the grip
- No compensation needed

Vise Grip Semi

Oval:

- 0 pitch in the grip
- No compensate needed
