

Basic Layout

“ The basic 60-degree layout in relation to the CG is ideal for beginner bowlers and applies only to symmetrical balls. It’s also a great option regardless of your grip type, whether conventional or fingertip!

? Why this layout is considered “basic”

A 60-degree angle is an intermediate value — not too small (which would make the ball start rolling too early), and not too large (which would delay the reaction).

This creates a balanced and predictable ball motion, perfect for learning how to read lane conditions.

The CG is positioned slightly below and to the right of the pin (for right-handed bowlers) or left of the pin for left hander, which maintains good static balance without the need for balance holes or extra weight adjustments.

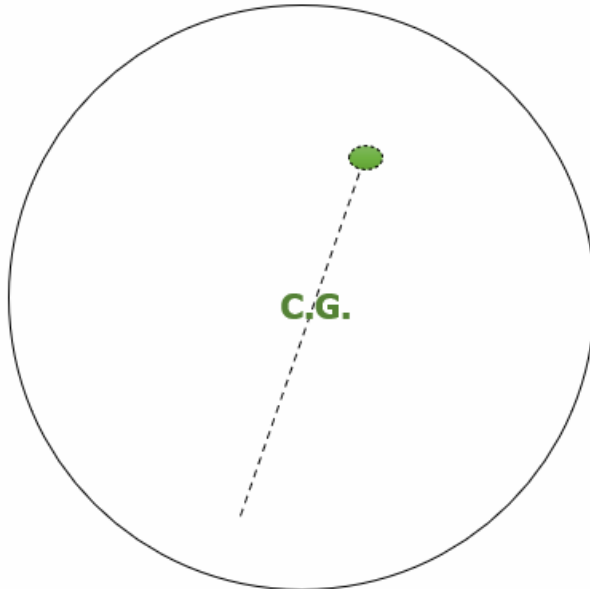

Basic Layout

- Ideal for entry level bal
- Great for both types of
 - Conventional
 - Finger Tip
- **ONLY USE ON NON-M/BIAS BOWLING BALLS!**

Use a prosect quart scale in order to process the layout . Here how it work in 6 steps :

STEP 1:

Basic Layout

- Only use a PRO SECT SCALE
- 1. Draw a line going from the Pin thru the CG

USE ONLY NON-MASS BIAS BOWLING BALL!

STEP 2:

Basic Layout

- Only use a PRO SECT SCALE
- 2. Place the 0 of the Pro Sect's ruler side onto the CG, place the 0 degree marker of the Pro Sect's protractor side onto the PIN

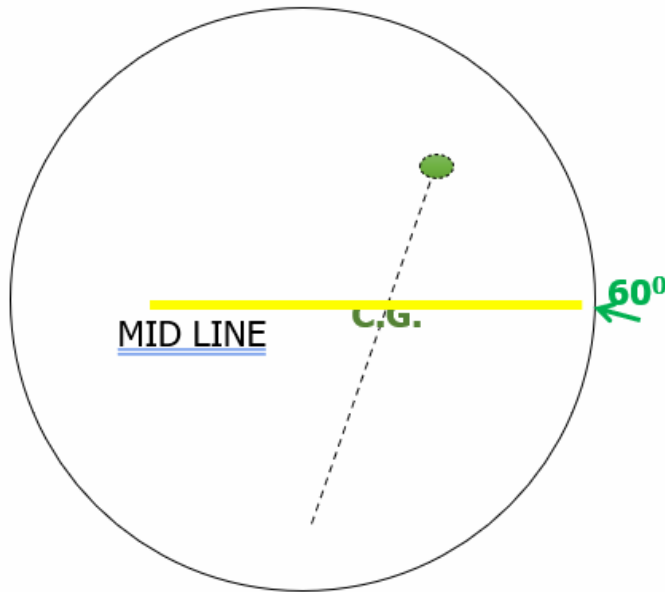

Mark the desired angle. In this case, 60 degrees.

USE ONLY NON-MASS BIAS BOWLING BALL!

STEP 3:

Basic Layout

Basic Layout

- Only use a PRO SECT SCALE
- 3. Draw a line starting from the mark you made in the last step going through the CG

This is now your Mid Line

USE ONLY NON-MASS BIAS BOWLING BALL!

STEP 4:

Basic Layout

Basic Layout

- Only use a PRO SECT SCALE
- 4. Measure $\frac{1}{2}$ from the CG

This is where your Center Line will cross

USE ONLY NON-MASS BIAS BOWLING BALL!

STEP 5:

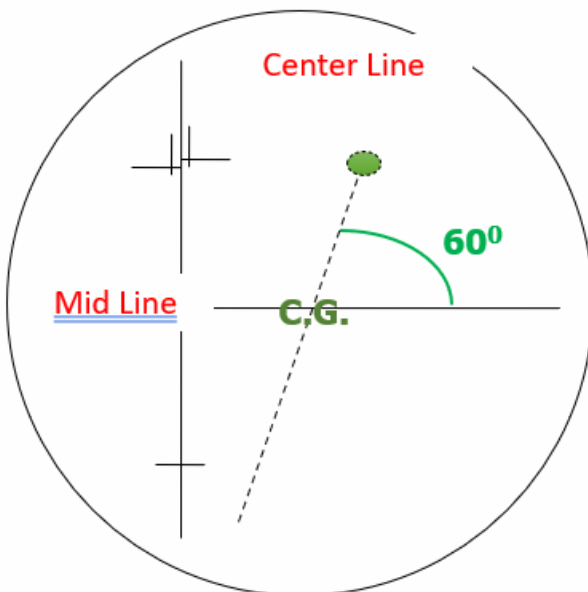

Basic Layout

- Only use a PRO SECT SCALE
5. Draw a perpendicular line to the Mid Line and this is your Cent Line

USE ONLY NON-MASS BIAS BOWLING BALL!

STEP 6:

Basic Layout

- Only use a PRO SECT SCALE
6. Divide the client's span in 2; mark your hole placements.

Bowl well!!!

USE ONLY NON-MASS BIAS BOWLING BALL!
