

Ball Speed and Rev Rate

1. All bowlers are different from one another. There are five categories of bowlers based on the speed-to-rev ratio, which are as follows:

1. **Rev Rate strongly dominates Ball Speed
(Highly Rev Dominant)**
2. **Rev Rate dominates Ball Speed
(Rev Dominant)**
3. **Ball Speed and Rev Rate match!**
4. **Ball Speed dominates Rev Rate
(Speed Dominant)**
5. **Ball Speed strongly dominates Rev Rate
(Highly Speed Dominant)**

2. It is **VERY IMPORTANT** to fully identify your player in order to select a bowling ball that meets their specific needs. Everything must be clearly filled out on this sheet, as shown in the example below:

- Fill out the spec sheet properly

<u>Informations techniques / Technical information</u>		
P.A.P: 4 7/8 x 3/8 ^		
Rotation de l'axe / Axis rotation: 30 - 60 °		
Hauteur de l'axe / Axis tilt: 11" / 17 °		
Vitesse / Speed:		
Basse/Low	Moyenne/Medium	Élevée/High
Taux de révolutions / Rev rate:		
Bas/Low	Moyen/Medium	Élevé/High
